

EIT Urban Mobility

Be part of the largest European community transforming mobility in our cities

Mobility for more liveable urban spaces

Urban Mobility

EIT Urban Mobility is supported by the EIT,
a body of the European Union

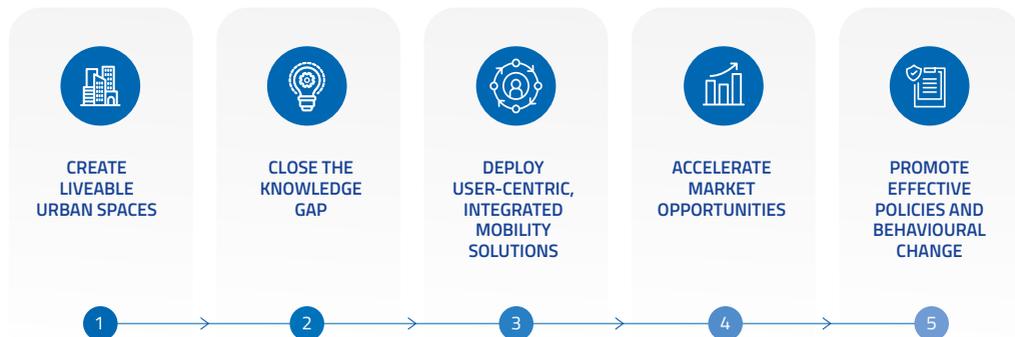

What? The challenge

EIT Urban Mobility strives for transformational impact. All activities of EIT Urban Mobility serve the purpose of eventually achieving **three societal impact goals**:

Five strategic objectives steer our activities and ambitions and will lead us to achieve our goals for urban mobility and eventually societal impact:

We engage
City challenges are at the centre of everything we do. We stimulate behavioural change that benefits people and cities by engaging citizens and transport users from the word go.

We accelerate
We boost the competitiveness of Europe's urban mobility industry by facilitating new business ideas and innovation, highlighting market opportunities and encouraging the appearance of new business models and players.

We connect
We bring all the key players in urban mobility together and encourage them to co-create. We aim to align solutions with the values and needs of society and to break down the silos between the actors.

We educate
We work on closing the knowledge gap on urban mobility through challenge-based training aimed at students and professionals using the latest education methodologies across disciplines and sectors.

EIT Urban Mobility belongs to the **European Institute of Innovation and Technology (EIT)**, an EU body created by the European Union in 2008 to strengthen Europe's ability to innovate. The EIT is an integral part of Horizon 2020, the EU's Framework Programme for Research and Innovation.

Where?

EIT Urban Mobility activities cover the whole European Union and beyond. We have **five Innovation Hubs across Europe** formed along geographical corridors, being the **headquarters in Barcelona, Spain**.

Innovation Hub Central, Munich

Innovation Hub East, Prague

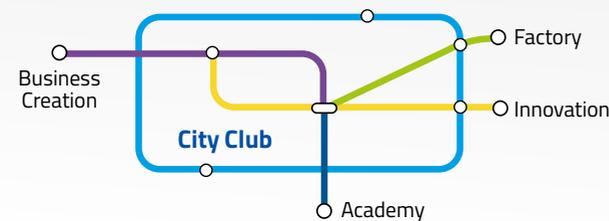

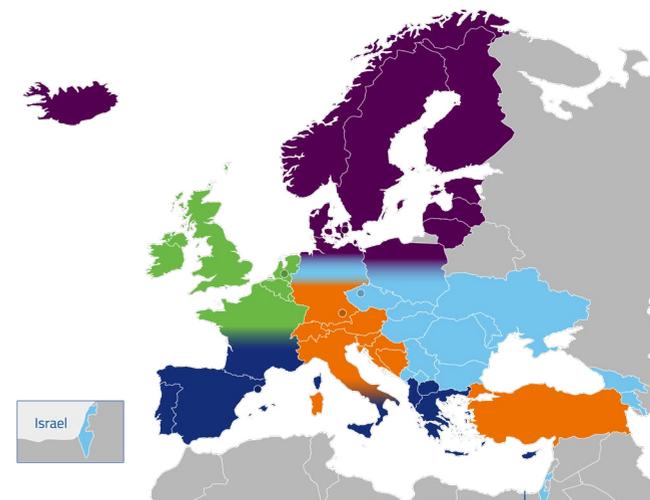

Innovation Hub North, Copenhagen

Innovation Hub South, Barcelona

Innovation Hub West, Helmond

EIT Urban Mobility's **Regional Innovation Scheme** is designed to boost the ability of countries classified as modest or moderate innovators by the European Innovation Scoreboard to enhance the local innovation ecosystem to support innovation in urban mobility by sharing good practice and expertise:

City Club
Defining challenges and sharing best practice

Business Creation
Creating business out of innovations

Academy
Closing the knowledge gap

Factory
Leveraging solutions globally

Innovation
From research to applied ideas

Who we are. Our vision, mission and community

As the leading European innovation community for urban mobility, we foster integration by bringing together the **key players across the whole value chain of mobility**.

EIT Urban Mobility is above all a network and our excellence comes from our partners. Our partnership has been carefully constructed to bring together world leading partners: Europe's most innovative **cities**, high-potential **industry** and best-in-class **universities and research institutes**.

They all support outreach, are actively engaged via the Innovation Hubs and cover the complete value chain from vehicle and traffic technologies to urban planning, data services, energy, retail, financial services and engineering. Together, they form a pan-European network of complementary stakeholders, representing multiple disciplines in urban mobility to solve the most pressing mobility challenges of cities.

Role of cities within EIT Urban Mobility:

Being at the core of our activities, cities are welcome to join our community. They are part of the City Club platform for collaborating, sharing best practice, upscaling ideas and putting them to work. Our cities act as test beds for pilots and living labs to enhance innovation in urban mobility.

How to get involved?

EIT Urban Mobility is open to welcome new partners. Any European entity can become part of our community. Are you interested?
Contact the Innovation Hub covering the country you are based in for more information on the next steps to be taken.

You can be one of the following types of partners:

Moreover, if you are a start-up or you would like to improve skills and knowledge on urban mobility, you can also get involved in our community by participating in activities offered through our Business Creation or Academy programmes.

Why to become part of our community

EIT Urban Mobility supports innovative solutions for the mobility of people, goods and waste, that increase liveability of our European cities and accelerate change towards a sustainable model of urban mobility.

Would you like to contribute to make our cities more liveable spaces?

Be part of the change and you will:

Gain access to the largest urban mobility community in Europe

Enhance visibility and reputation for your organisation

Inspire, get inspired and engage with stakeholders from the complete value chain of mobility

Be coached and advised on the partner-search and preparation of your proposal for EIT Urban Mobility calls

Play an active role in the design and evaluation of innovative mobility solutions in your region and respond to real-world cities challenges

Gain access to funding support for innovation projects, investors and investment opportunities and solutions for your needs

Support sustainable transport and the positive changes in the way people move around cities

Participate in meetings and events with relevant counterparts to share good practices, strengthen synergies and future cooperation

Positively contribute towards green energy transition and the European Green Deal implementation
