

# Expression of Interest Form FAQs

## 1. Can I submit more than one request?

Yes, you can submit more than one request to partner with EIT Urban Mobility within one or more challenge areas. If you wish to submit more than one request, you **must** submit one expression of interest form per each call so that EIT Urban Mobility has the necessary information to fully consider each of your requests.

## 2. What will happen after I submit my request?

After the submission of a web form request the following will take place:

Step 1: Within 2 working weeks, EIT Urban Mobility will review the request and reply indicating if the request has been accepted for Step 2 or rejected.

Step 2: Follow up meeting with consortium coordinators to identify matching roles and capabilities.

Step 3: Project proposal coordinators will make the final decision about consortium composition. **How does EIT Urban Mobility evaluate submissions?**

EIT Urban Mobility evaluates submissions based on:

- how well it matches with other consortium partners and
- the quality of the proposed contribution to the specific funding proposal.

The final decision over acceptance or rejection will be made by the EIT Urban Mobility AIG team (and parties coordinating specific consortia).

## 3. If I am approved to be on a consortium, what happens next?

The process will vary based on the specific call. The relevant AIG challenge area coordinator will ensure that consortium members identified by EIT Urban Mobility receive the necessary timelines and information about the proposal drafting and submission process, participate in the necessary meetings among consortium members and if required, can access external support for proposal writing.

## 4. Is EIT Urban Mobility interested in partnering for other funding opportunities outside those pre-identified in the survey?

While the current focus is on pre-identified calls, EIT Urban Mobility remains flexible in supporting the urban mobility innovations ecosystem. Examples of relevant funding instruments include Interreg, Connecting Europe Facility (CEF) and Interregional Innovations Investments (I3).
