Questions & answers

Questions can only be asked via Questions and Answers within Zoom

You can post your questions during the event and we will answer the questions that have been posted.

*Please be aware that the event will be recorded and viewable for a limited period afterwards. If you want to protect your privacy, we advise you to ask your question anonymously. If you ask a question under your name, please note that your name might be displayed on the screen during the session.*
EIT Community New European Bauhaus

Lead: EIT Climate-KIC

Participated: EIT Digital, EIT Food, EIT Manufacturing, EIT Urban Mobility

Natalia Vera
EIT Community NEB Manager
EIT Climate-KIC

#NewEuropeanBauhaus
EIT Community New European Bauhaus- 2021 in figures

- **12 NEB start-ups** and scaleups acting as Pilots, identified and supported with grants and acceleration services *(500K)*.
- Lessons Learnt on NEB Pilots.
- **1029 start-ups** and scaleups attracted by the EIT Community Booster *(1000K - 20 ventures)*.
- **2 NEB online** courses with 250 learners enrolled.
  - Creating Ethical and Sustainable Cities at the Local Level
  - Bringing Urban Nature Into the Cities of tomorrow
- **2 Citizen Engagement Calls**, attracting 118 applications and supporting 16 projects *(425K)* with dedicated site.
- **12.227 participants** of 2021 hackathons held by the EIT Community NEB reached through the NEB Ideation Awards.
- EIT Community NEB YouTube channel: 9,938 views, 5,200 unique viewers, 112.8 hours watch time and 91 subscribers.
- **10 info-sessions** for EIT Community NEB opportunities.
EIT Community New European Bauhaus- 2022 upcoming opportunities!

- **Call EIT Community New European Bauhaus Call for proposals for Citizen Engagement Activities**
  
  Budget: 120K total investment - 15K per project proposal

- **Call EIT Community New European Bauhaus Call for Co-Creation of public space through citizen engagement**
  
  Budget: 270K total investment - 45K per project proposal

- **Call for Partners: 2022 New European Bauhaus Hackathon Week Organizing Partners**
  
  Budget: 180K, 30K per host

- **Call 2022 NEB Ideation Awards**
  
  Award prizes of 10K to 5 best proposals. 5 Award categories, one per NEB axis, plus NEB for peace. Total: 50K

- **EIT Community Booster- Scaling Up New European Bauhaus Ventures**
  
  Budget: 1000K, 50K per start-up.

EIT Community New European Bauhaus

Call for proposals for Co-Creation of public space through citizen engagement

Maria Marrugat
EIT Urban Mobility
26 April 2022
Strategic focus of the Co-Creation of Public Space through Citizen Engagement

The EIT Community is looking for inspirational, beautiful, sustainable, and inclusive projects, that aim to demonstrate new solutions that boost the transformation of our cities, peri-urban and rural areas by:

- Bringing **individuals and communities closer to nature**, regenerating natural ecosystems and boosting biodiversity.
- Bringing **sense of belonging**, significance of places and communities.
- Addressing the **needs of territories, communities that needed specific attention** due to economic, social or physical characteristics.
- Transforming **value chains and life of materials towards circularity** taking into account sustainability, aesthetic and social aspects.

Proposals need to embed and integrate all the 3 core New European Bauhaus values (**sustainability, aesthetics, inclusion**) and all the three key New European Bauhaus principles (**multilevel, participatory, transdisciplinary approach**) into their projects.
Strategic focus of the Co-Creation of Public Space through Citizen Engagement

Cities, regions or affiliated entities must provide in their proposal:

- Integration of project proposal or solution into the planned or current public realm improvement project or city strategy

And:

- An approved public realm infrastructure where project proposal or solution can boost its implementation and co-design with citizens

Or:

- Availability of physical public spaces where the new project proposal can improve their qualities following New European Bauhaus challenges and by implementing the New European Bauhaus approach

Proposals must provide deep understanding of the local ecosystem, including stakeholders, culture and social dynamics, as well as expertise in citizen engagement activities and innovation/action. **Project outcomes** should aim at influence local decisions and strategies and achieve considerable resonance with policymakers and strategic planners.
EIT Community New European Bauhaus Challenges

All activities will address at least one or more of the New European Bauhaus Thematic Axes:

- RE-connecting with nature
- RE-gaining sense of community and belonging
- Prioritising the places and people that need the most
- The need for long term, life cycle and integrated thinking in industrial ecosystem

The EIT Community Co-Creation of public space through Citizen Engagement Call will find innovative solutions in New European Bauhaus themes. Through citizen engagement public spaces in cities, peri-urban and rural areas will be co-created and/or re-designed.
Expected outcomes

Projects will develop activities in cities, peri-urban and rural territories where people across Europe can exchange knowledge and create transdisciplinary projects addressing sustainability, quality of experience and inclusiveness.

- **Products and services** (including rapid product prototypes) enhancing nature-based-solutions, promoting green spaces, improving quality of experience of citizens, delivering public and private realm infrastructure and facilities with a focus on specific vulnerable people or promoting long-term use of products;

- **Co-design and co-stewardship** of green spaces, and natured-based-solutions through public-private partnerships and social participation; **Co-design of public realm and commons** with civil society to favour diversity, strengthening inclusivity and equitability, and/or foster circular economy by multi-stakeholder designs;

- **Social activation and education activities** on nature-based solutions, highlighting commonalities of sustainability and resilience, promoting heritage and culture, enhancing sense of belonging, and changing individual and group behaviours towards more sustainable/circular approaches.
Call for proposals for Co-Creation of public space through citizen engagement

Grant

- 6 proposals will be awarded up to 45K€ grant each

Output deliverables

Successful implementation of 6 projects in 6 regions/cities in EU Member States or Horizon Europe Associate Countries by 31 December 2022. The applicant should deliver:
  - Intermediate Report
  - Final Report

Eligibility Criteria

- Applications are eligible from a public or private legal entity within EU Member States or Horizon Europe Associated Countries.
- Applications from RIS countries (Regional Innovation Scheme) are encouraged.
- Applications must be consortia of a minimum 2 partners and a maximum of 4 partners. One of these partners must be a City, region or an affiliated entity to a City or region located in an EU Member State or a Third Country associated to Horizon Europe.
- Proposals must clearly address and identify the 3 mandatory EIT Core Key Performance Indicators (KPIs), including the reference to the target value.
- The applicant must submit a letter of intent from city, region or affiliated entity, showing their involvement in the project and commitment to start the project within a month after receiving confirmation of the funding award from the EIT Community NEB.
- The applicant must complete all the sections of the attached application form, in English, respecting the page limit of each section and submit it within the submission deadline.

Activities will take place between 1 July and 31 December 2022

#NewEuropeanBauhaus
Requirements: Application Form

The applicant must complete all the sections of the attached application form, in English:

1. **PROJECT INFORMATION**
   Name, acronym, start & end date

2. **APPLICANT INFORMATION**
   Organisation’s details including PIC number, GDPR.

3. **EXECUTIVE SUMMARY**
   Clear, concise description of the project
   Key words from the link & free keywords
   Select NEB challenges addressed by your proposal

Please identify the selected EIT Community New European Bauhaus Challenges addressed by your proposal

<table>
<thead>
<tr>
<th>Please identify the selected EIT Community New European Bauhaus Challenges addressed by your proposal</th>
<th>In case you selected more than one, please indicate the most relevant to your application.</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐  Re-connecting with nature</td>
<td>☐</td>
</tr>
<tr>
<td>☐  Re-gaining sense of community and belonging</td>
<td>☐</td>
</tr>
<tr>
<td>☐  Prioritising the places and people that need it the most</td>
<td>☐</td>
</tr>
<tr>
<td>☐  The need for long-term, life cycle and integrated thinking in industrial ecosystem</td>
<td>☐</td>
</tr>
</tbody>
</table>
**Requirements: Application Form**

4. **BACKGROUND INFORMATION**
   Define area/location where project will take place, including:
   - Specific challenges of that area
   - Relevant city district/regional strategies
   - Citizen engagement activities to further understand and co-design contextual solutions

5. **EXCELLENCE & INNOVATIVE ASPECTS**
   Describe objectives of the projects (SMART) and how they are clearly related to outcomes.
   Describe how the proposal addresses NEB challenges and how embeds and integrates the core values (sustainability, aesthetics and inclusion) and principles.

   Describe methodologies, tools and processes planned to engage citizens/end-users in the co-design of public space. In the overall, the proposal need to prove its need and relevance for society.

**Evaluation criteria**

<table>
<thead>
<tr>
<th>Excellence and Innovative aspects of the proposal</th>

</table>

Good practice is a practice that has been proven to work well and produce good results and is therefore recommended as a model.
Lessons learnt are an analysis / record of a learning process in the development, implementation and follow-up of an innovative approach, process or activity. Lessons learnt are often a by-product of identifying and validating good practices.

Requirements: Application Form

Please remember the application form must be signed by each member of the consortium sent with a letter of intent from the city as a single pdf by email before 29 May 2022 at 23:59 CEST to:
NEBcall4cities2022@eiturbanmobility.eu

For any concerns or queries please email:
maria.marrugat@eiturbanmobility.eu;
Natalia.vera@climate-kic.org;
Tommaso.emiliani@eitfood.eu

Winners of the current Call will have the opportunity to interact with the New European Bauhaus Community, NEBLab and other relevant New European Bauhaus activities through sharing information, best practice, and, where relevant, results.
Timeline of the EIT Community Co-Creation of public space through citizen engagement Call

- **Closing call: 29 May 2022** (23:59 CET)
- Eligibility and admissibility check: 1 week of June 2022
- Evaluation: Mid-June 2022
- Communication of results to the participants: Mid-June 2022
- Conditions clearing: End of June 2022
- Signing contract: End of June 2022
- Start of project: 1 July 2022 (latest)
- Finalise project: 31 December 2022 (latest)
During 2021, EIT Community New European Bauhaus mobilised both public and private partners to develop talent and skills and showcase high-value impactful innovations.

- More than 500 citizens and end-users were engaged in ideation and co-design events presenting several proposals to local authorities.

- Further info can be found on the EIT Community New European Bauhaus website.
The project “FURNISH - protegim les escoles” project: In 2020 the Municipality of Barcelona has set the project “Protegim les escoles” as a high priority strategy to provide Barcelona’s schools with safe, comfortable, and healthy public spaces, that act as meeting places for children, their families and neighbours. By 2030, it is expected that all 585 schools in Barcelona will offer safe and comfortable surroundings. In line with this, the EIT Community “FURNISH” project helps realise this goal. The project provides interesting and interactive prototypes to stimulate permanence in these areas. The “FURNISH” works with transitional spaces, connecting the urban and school environments in a creative way, promoting longer stays before and after school hours, and become extensions of classrooms and playgrounds, engaging children to play, be active and learn.

Examples of successful pilot projects developed during 2021:
The “Container Gardening” project contributes to the aesthetic and functional redevelopment of a part of the University of Turin that has been unused and abandoned for years, including as a waste dump. The project uses the New European Bauhaus values for urban regeneration and redevelopment of a place through food. The material used to the build-up of the infrastructure are completely retrieved through circular economy processes. In particular, through co-design and co-creation, a space dedicated to the production of fruit and vegetables through container gardens was created.

Examples of successful pilot projects developed during 2021:
The “CLIME” project optimises heritage experiences for climate resilience, connect it to cultural change, adaptation and inclusivity and revive the ‘Councils of Elders’ connection with young people. The project connects city and nature by conceptualising cities in the natural environment in a gamified AR mobile app. “The Equinox XR” app allows young people to discover how elders experienced nature and culture.

MUNICIPALITY OF VIGNOLA (ITALY)
Challenge description

What?
Urban regeneration of former farmers’ market.

Where?
The market is located in the central urban area of Municipality of Vignola, ITALY

Who are the end users?
Small business, local associations
Challenge description

Background information
The Municipality of Vignola is running a democracy direct platform (partecipattiva) that allows to get citizens involved in participative processes.

What does good look like?
The aim of the project is to:
• Involve citizens to identify use of farmers market
• Vote and select the solution proposed
• Define an implementation plan

What will the city provide?
Access and use of the partecipattiva platform
Access to data and technical information

Urban regeneration project of train station

CO-CREATION OF PUBLIC SPACE THROUGH CITIZEN ENGAGEMENT

İzelman A.Ş. is an İzmir Metropolitan Municipality establishment in Turkey.
Challenge description

What?
Please provide your challenge statement

Where?
Please specify the location (you can provide a map, a picture of the current status, etc.)

Who are the end users?
i.e.: small business owners, elderly people, children, etc.

We have recently started the TeachSDG project in our kindergartens. Now we aim to organize public spaces such as Metro station, ferry, carparks learning centers for SDGs and to create a platform for civic engagement by using digital tools. We would like İzmir public to be aware of SDGs and participate to decision making processes for localizing SDGs.

İzmir public spaces ferry stations, metro stations and other cultural cafes and places managed by İzmir Metropolitan Municipality.

İzmir public are the end users both children and elderly people. Our aim is to create intergenerational learning with the vision of UNESCO learning cities. People will learn SDGs by city furnitures and a specific web page will be prepared to publish the SDG investments of the municipality. People will vote planned and realized SDG investments. The other learning spaces will be arranged for civic engagement with local authorities such as meetings with children assembly.
As a result of the survey we conducted with 1300 people in Izmir districts within the scope of a project, it was determined that the number of people who knew the SDGs was only 19 people. The lack of awareness of SDGs reduces the participation of citizens in projects and activities in this field. This causes the activities not to find sufficient response from the public.

City will provide all public spaces, data, communication with public and facilitate stakeholders engagement with a team dedicated to the Project.

SNAILSTEP
rewarding your steps!
Solution description

**What?**
In Spain alone 26.66% of the population does not do any physical activity due to work or family responsibilities. In addition to this, we have been involuntarily sedentary over the last two years due to the post pandemic effect, and this same effect is causing 68K local businesses to be in recession in the cities.

**Where?**
We did the validation of this idea, in different provinces of Spain, in 500 online interviews/surveys online.

**Who are the end users?**
Our end users (target audience) are women and men between the ages of 23 and 65 who use technology at an average level and who, for work or family responsibilities, are unable to engage in regular physical activity/sports and want to take care of their health and well-being.
Expected impact of your solution

In addition to representing health and wellness, it is a cross-cutting tool for implementing the Sustainable Development Goals in cities.

Health and wellness (encouraging people to be active). Sustainable cities and communities. (reactivating the economy of local stores and businesses). Sustainable consumption and production (encouraging tourism hand in hand with health and wellness). Climate action. (decreasing the carbon footprint of cities). Alliances to achieve objectives. (creating synergies and collaborations with cities and public bodies).

What would you need from the city?

A strategic alliance, between Cities and Snailstep, creates the perfect synergy to achieve the objectives, because cities are the space from all perspectives and points of view, where their inhabitants can improve their quality of life and start taking care of their health and well-being by incentivizing and rewarding them hand in hand with the mobile application.
A JOURNEY OF A THOUSAND MILES, BEGINS WITH ONE STEP

JOIN YOUR STEPS, IN THIS JOURNEY !!

THE 4.0 FOUNDATION

Our virtues can be seen while we chase after our 4 zero mission

- To propagate the **halo of health, science and creativity**
- To achieve the **net-zero carbon emissions** goal
- To promote the **circular economy shift**
- To advocate for **zero segregation**
Solution description

What?
The main challenge in the post-covid world is to nurture confidence and trust in science and medicine, hence framing resilient society to face the future climate change threats.

How and Where?
By raising the LACUNA – Maker Space for Biomedicine and Evolution.
Where? At the VITOSHA MOUNTAIN, Sofia, Bulgaria
15 min (by car), 30 min (by bus), 15 min (by gondola cable)

Who are the end users?
The Lacuna stakeholders’ group will be filled by Students, Pupils, Scientists with multiple backgrounds, Engineers, Citizens, Business owners and many more. It will be opened to all curious people inspired by science, medicine, and nature.

Innovator
Contact person
E-mail address

The 4.0 Foundation
Vesselin Drobenov
Vdrobenov@40foundation.org
Solution description

Background information
The LACUNA idea emerged during the CODIV-19 pandemic as a series of open access Zoom meetings, where professionals related to the 4.0F were debunking myths, anti-vaccine propaganda and quasi-scientific statements. As a result, movement towards establishing a public space where citizens can encounter and even participate in real scientific research emerged. The concept behind the LACUNA is to INSPIRE, to CREATE, to INVOLVE, to EDUCATE, and to EVOLVE emerging great ideas, as a real BSL2 Sci-tech Maker Space.

Expected impact of your solution
The LACUNA is hatching impact on individual level, but also it affects the whole ecosystem of creative and curious people who wish to harness the power of science. We build sustainable social and civic resilience towards future pandemics, post-covid abnormalities, new and endemic diseases, ideas for new therapies, alternative use of drugs, and all under the control of the EU regulatory bodies. Having a social space where you can encounter with a real-world scientists, educate and join top level research, challenge your mind with the LACUNA scientific challenges can and will builds confidence and understanding towards the importance of science. And being close to nature in the heart of the Vitosha mountain will level up the experience to an unimaginable extent.

What would you need from the city?
Our current standing:
- Arranging long term contractual agreement for an old rehabilitation facility
- We seek for financial support via crowdfunding campaign(s)
- We need people to spread the word for the LACUNA establishment
- We invite scientists around the world to work with us of a short and long term basis

Solution description

What?
- Democracy around the world is being challenged.
- Our built environment has a huge impact on our lives.
- Youth are often excluded from democratic processes.
- Our focus is involving young people in democratic urban design.
- By involving Youth in the shaping of our neighbourhoods and urban environment we facilitate empowerment and a sense of ownership.

Where?
- Based in Copenhagen, we operate both locally in Scandinavia as well as internationally - facilitating both in person and online engagement.
- We collaborate with a diverse range of organisations from schools, to municipalities, to transit authorities across many disciplines.

Who are the end users?
- Our end user encompasses everyone across society. We act as facilitators gathering diverse stakeholders around a common platform while having a particular focus on engaging with youth.
Solution description

Background information
- We identify as facilitators of collaborative processes, whether in the development of strategies, analysis or physical design.
- Our particular focus on translating ideas into final designs helps ensure that the citizens’ voices appear throughout the process.

Expected impact of your solution
- With a focus on the main NEB pillar of inclusion: Our primary impact is involving citizens and youth in the process and creating a sense of empowerment and ownership with youth.
- Our solution would also center around the themes of ‘Prioritising the places & people that need it the most’ & ‘Regaining a sense of community’

What would you need from the city?
- Close collaboration with partners to ensure the project is rooted in the city / organization.
- Depending on scope, recruitment of participants.

Solution description

What?
We are a conversational assistant platform with an award winning AI. We have been accepted for acceleration in Barcelona, Spain and Kosice, Slovakia - We are looking for seed money to enable EU grant funds matching, medical compliance, marketing our pilot program and supporting the sales team. Profit sharing is part of our business model, making us an interesting data collector for EU institutions wishing to leverage their aggregated understanding and serve EU citizens. Moreover, we fund social / municipal innovation through the sharing of our income. This isn't just a chat bot, but rather a multi-facing platform.

Where?
Malta MCAST - Education
Barcelona, Spain - Health
Kosice, Slovakia – KOSICE 2.0 Smart City

Who are the end users?
Residents of municipalities who have health education and environmental needs.

Solution description

**Background information**

**Integrated Natural Language Processing / IOT Platform**

We have a low code no code solution that can be deployed locally or online. Dialogs are human reviewed and configured by text file or simple QA interface.

**Expected impact of your solution**

We offer sustainability communication, involvement of relevant stakeholders, state of the art UX award winning platform and inclusion in monetization of aggregated user data.

- Reduction of QA for routine municipal questions of up to 30%
- Income for city innovations from selling aggregated data.

**What would you need from the city?**

- Access to program communications officials
- Access to data
- Freedom of operations to promote adoption programs
- Initial budget for pilot of 25k – Allocated staff for deployment
- Onsite hardware if local deployment is selected.

Bespoke EV Charging Solutions

#NewEuropeanBauhaus
Solution description

What?
➢ EV drivers cannot charge in residential, office or commercial buildings with multi parking
➢ Risk of overheating cables/pressure on the grid
➢ Public EV charging stations are limited, not available or expensive
➢ Increased number of EVs parked on the streets
➢ High investment to increase energy capacity
➢ Management of the EV charging stations

Where?
EVtech4U is based in Ljubljana/Slovenia allowing us to provide our solutions in all neighboring countries

Who are the end users?
People living or working in buildings, building managers, construction/ engineering companies, public buildings, hotels, etc.

Innovator
Mauricio Sardi

Contact person
Mauricio Sardi

E-mail address
Mauricio.Sardi@evtech4u.shop
Solution description

Background information

Expected impact of your solution
✓ EV charging available for any building, using already existing parking spaces
✓ Manage and limit energy supply for EV charging
✓ Affordable EV charging implementation and use
✓ EV driver experience made simple, efficient and reliable
✓ Delegate management of EV chargers, maintenance, payments, etc to EVtech4U

What would you need from the city?
Facilitate stakeholders engagement, develop public policy to allow more people to charge in buildings, evidence that the implementation is possible at the cities’ buildings.

Healthy Cities Generator

A hands-on, practical tool that gives actionable indicators to incorporate health into urban planning.
Healthy Cities Generator: our model

- An **evidence based, transdisciplinary model** that promotes healthy places, aligning with all NEB values
  - **DENSITY**
    - Appealing & accessible neighbourhoods
  - **MOBILITY**
    - Sustainable, walkable & cyclable areas
  - **VARIETY**
    - Accessible & diverse places
  - **ENVIRONMENT**
    - Increase biodiversity & lower air pollution
  - **HOUSING**
    - Comfortable and accessible homes

- **Quantifiable outputs** to support the creation of healthier, high-quality places
Healthy Cities Generator: BETA version

- Incorporate social health indicators
  - Gentrification
  - Gender
  - Safety (etc.)

- Develop co-creation & citizen participation entry points
  - Improve usability
  - Pilot workshops in current urban transformation plans
  - Test on different scales

- Apply to existing city development plans to activate citizens in the planning process and improve health outputs

Solution description

What?
Challenge: to enrich a green infrastructure of the historical areas around the Grand Harbour of Malta.

Where?

Who are the end users?
Local citizens, tourists, small businesses.

Innovator
Irina Neganova, PhD candidate, Hanken School of Economics

Contact person
Irina Neganova

E-mail address
irina.neganova@hanken.fi
Solution description

Background information
The Grand Harbour of Malta is one of the largest natural harbours in the Mediterranean. The port has been used extensively throughout history and thus contains several forts, wharves and docks, giving it a unique character as a cultural heritage of the Mediterranean.

Expected impact of your solution
Sustainability: greenery provides less heat in summer and natural drainage system during floods and storms.
Quality of experience: it provides pleasant touristic experience.
Inclusion: citizens are direct beneficiaries and are ready to participate.

What would you need from the city?
I’d like to get from the Regional Council of the Port Region the data about the current status of green infrastructure projects covered the areas around the Grand Harbour of Valletta, their scope, time and budget as well as the main stakeholders.

Solution description

What?
The local urban fabric improvement of Kütahya city center via citizen engagement
Project: Creating a walking route which has inclusive and flexible public spaces at the nodes

Where?
Kütahya, TURKEY

Who are the end users?
Middle and lower income groups, elderly people, children, local businesses, citizens who have low or none attachment to the city
Solution description

Background information
280,000 population in city center, median age 34, elder population, social and economic vulnerabilities, detached social groups, lack of place attachment among some groups

NEVERTHELESS
several potentials as great historical identity and natural resources, 40,000 university students, job opportunities for qualified employment, multi-layered community – migration

Expected impact of your solution
Sustainability: natural, historical and social sustainability, revitalization of deserted spaces within the city, integration of nature and urban culture
Quality of experience: valorization of historical and communal values, local and touristic experience
Inclusion: increased place attachment, participation of various groups

What would you need from the city?
Partner expectations: Access to data, facilitate stakeholders engagement, technical infrastructure support, announcements and dissemination

Challenge description

What?
Please provide your challenge statement

Where?
Please specify the location (you can provide a map, a picture of the current status, etc.)

Who are the end users?
i.e.: small business owners, elderly people, children, etc.

---

Recognition of the identity value of the PCI **Intangible Cultural Heritage** as an aesthetic and Sustainable Development tool in rural territories, through the discovery of artistic and creative TALENTS in application to the beautification of Eco-Cultural Public Spaces in the territory of the Sierra de Francia of Salamanca based in sustainability, the inclusion of vulnerable people and creative and participatory aesthetics.

https://www.facebook.com/groups/arrayan.poveda

As an experience and the collaboration of the City Council of **San Esteban de la Sierra**, we started the **ALDABA project** of design, education and application of the iconography of the Intangible Cultural Heritage of Popular Embroidery of Sierra de Francia in Salamanca in the embellishment of public spaces.

https://www.facebook.com/El-Corral-del-Cura-de-San-Esteban-de-la-Sierra-443807402335056

Unemployed people, different groups of the local population: children, youth, adults and older people. Also visitors and tourists related to the Sustainability of Heritage and the New Cultural and Creative Tourism in rural areas.
What does good look like?
Please keep in mind the 3 main pillars of the New European Bauhaus (NEB) initiative: sustainability, quality of experience and inclusion.

What will the city provide?
i.e. access to the site, access to data, facilitate stakeholders engagement, etc.

Challenge description

Background information
Free format: text | pictures | maps

What does good look like?
Please keep in mind the 3 main pillars of the New European Bauhaus (NEB) initiative: sustainability, quality of experience and inclusion.

From the creation of the Red Arrayán Lab-CREARTE, the "EnTre2 Plan" project was generated in 2018 for the recognition and enhancement of the Intangible Cultural Heritage of Popular Embroidery of the Sierra de Francia in Salamanca. With two lines of work: SAFEGUARDING (according to UNESCO) and INNOVATION, in application of the Iconographic Universe of this Identity Heritage to new supports, spaces and artistic, craft, educational and tourist proposals.

The discovery of personal talents and recognizing the value of Cultural and Natural Heritage as a basis for territorial cohesion, sustainable development and the integrative, educational, aesthetic and participatory application for the creation of Beautiful Spaces for the benefit of communities and eco-tourism. culture in peripheral rural and mountain territories.

The City Council of San Esteban de la Sierra provides materials, tools and part of the financing for artistic interventions, with access to data and the Eco-Cultural space for carrying out cultural activities for different population groups. Also communication website and RR.SS of the project and promotion for visits to school groups and tourists. https://destinosanestebandelasierra.es/los-contadores-bordados
Final slide
The safest and smartest online parking for bikes and scooters

Barcelona, April 2022
Solution description

What?

vadeBike is the safest and smartest parking network for bicycles and scooters, specifically designed to organize micromobility and provide electric charging to the vehicles.

Where?

Barcelona 50% implemented

Who are the end users?

TOWN HALLS

CITIZENS

SHARING RENTING

TRANSPORT AUTHORITIES

INDIVIDUALS AND COMPANIES

New European Bauhaus beautiful | sustainable | together

#NewEuropeanBauhaus

Innovator

Vadecity

Contact person

Marta Recasens

E-mail address

mrecasens@vadecity.com
Solution description

Background information

Expected impact of your solution

- **vadeBike** helps you **order micro-mobility** digitally and in a network in the **safest and most intelligent way**.
- vadeBike offers a service that generates **traffic of people**, with new models of **economic income**.
- We are aligned with 7 of the 13 SDGs, 11 (Sustainable cities), 13 (Climate action), 7 (Affordable and clean energy), 9 (industry, innovation and infrastructure), 12 (responsible consumption and production) and 3 (health and well-being)

What would you need from the city?

Cities should create **public tenders** for safe and intelligent cycling and micro-mobility infrastructure, in order to generate sustainable mobility culture in the city and encourage private entities to follow suit in private public use stations, and thus build a global network of safe, intelligent and connected infrastructure making the city a better place to live.

#NewEuropeanBauhaus
An app to enable citizens to draw their ideas in the city and share these ideas via Augmented Reality
Create and share urban ideas with augmented reality

**What?**
Citizens can draw or upload pics of their ideas to improve places in the city. These ideas are anchored at a certain place and can be explored by other users.

**Where?**
We’re starting in Stockholm but could be anywhere in the world.

**Who are the end users?**
Users of public spaces who have ideas that they want to express when at a certain place.

New European Bauhaus
beautiful | sustainable | together

#NewEuropeanBauhaus
Background information
We started off as an app for orienteering in cities. Then, with several pivots, we realised our AR function can work as a tool for placemaking in cities.

Expected impact of your solution
Citizens would feel more comfortable sharing their ideas regarding how to improve places. Moreover, public and private organisations can carry out planning consultation in an easier, visual and powerful way.

What would you need from the city?
We mainly need publicity and connections to enable adaptation, in order to get citizens onboard with our solution. Possibly a number of events where citizens can express their ideas through the app.

(That was from our days as an orienteering app)

A celebration of local communities taking action for a healthier, fairer, regenerative Europe

We invite any community that is taking action for a better world to join us in celebrating the European Day of Sustainable Communities.

Previously the day has been celebrated in up to 28 countries by community gardens, energy cooperatives, cafes, churches, ecovillages, housing associations, permaculture gatherings, arts festivals, schools, universities, Transition town groups, to name but a few.

Learn more at communitiesforfuture.org/sustainable-communities/
Role of a Partner for the European Day of Sustainable communities

- Supporting individuals, and organizations and communities in your country or region, who are interested in co-creating the Day.

It involves:

- Translating some of our communications material into your local language
- Promoting the Day through your members and networks and social media
- Helping identify and liaise with a couple of journalists in your region or country
- Or even organising an event!

Solution description

What?
ENERGY EFFICIENCY IN BUILDINGS. (Green and Digital Balanced Buildings)

Where?
Anywhere where people have a housing problem

Who are the end users?
In Maslow's hierarchy, the need for shelter has been determined as the second priority need and has been put forward as the need to be met first.

Innovator
Yusuf Deniz İNAN
Yusuf.inan@yalova.bel.tr
Solution description

Background information
Today, non-measurement-based energy identity certificates are given to buildings. However, this needs to be based on measurable data in the green building concept.

Expected impact of your solution
Turkey’s total 233.6 billion kWh final electricity consumption 54.7 billion kWh, which corresponds to 23.45% of, is consumed in residences in 2018. With this study, 12% savings in energy consumption are expected.

What would you need from the city?
Changing building energy licensing processes and measurement standards and purchasing the necessary simple devices and putting them into practice as a pilot region stakeholders.

PLACE MAKING WESTERN BALKANS

drawing © Dušan Petričič
Solution description

What?
Fighting the loss of neighbourhood green public spaces (due to rapid urbanisation and densification) by establishing edible urban gardens and “pockets”. Using diverse placemaking methods to drive the civic engagement in identifying the needs and co-creating the designs.

Where?
Neighbourhoods and densely populated inner cities of the Balkans (and South East Europe) in need of sustainable, inclusive and meaningful renewal of small-scale public spaces of everyday life.

Who are the end users?
Citizens, their formal associations, small businesses and social entrepreneurships dealing with urban food, gardening, manufacturing, etc.

Innovator
Placemaking Western Balkans / Belgrade / RS

Contact person
Milena Ivkovic

E-mail address
milena.ivkovic@placemakingweb.org
Solution description

Background information
Placemaking Western Balkans is using digital and analogue gamification methods for civic participation and generation of designs, recommendations and solutions.

Expected impact of your solution
Sustainability: increasing biodiversity, fighting the urban heat island effects, optimizing mobility and safety, transforming existing (“brownfield”) neighbourhood public spaces. Engagement: local community is engaged in action-oriented planning, research and design stages. Inclusion: overcoming the challenges of complex social structures by providing simple placemaking methods everyone can understand and use.

What would you need from the city?
Collaboration on the location choice, technical support, communication support and legal (permits and procedures) support.

WeSolve
Better Together
Solution description

What?
Co-creation of activities enhancing urban regeneration and public realm using both physical and digital participation. The WeSolve co-creation functionalities can be easily integrated in existing web and mobile apps.

Where?
We can provide our solution across any European city.

Who are the end users?
Citizens, both young people (WeSolve mobile / web app) and elderly people (WeSolve Point).

Engage and solve challenges
- Submit ideas
- Answer surveys and polls
- Report issues
- Stay updated

No more language barriers
Automatic content translation from 90+ languages.

Rewards
More participation thanks to a gamification model based on CO2 emissions offset.

Privacy and transparency
The anonymous feature allows citizens to submit their feedback hiding their identity.
Solution description

Background information
Currently used by major European cities like Barcelona, Logroño, Jelgava, Kolding, etc. Rated as one of the top 14 global solutions for citizen engagement by World Summit Awards 2021. Read more on our website: https://wesolve.app

Expected impact of your solution
• Co-creation of public realm projects together with citizens
• Multilevel, participatory, transdisciplinary approach
• Improvement of sense of belonging
• Promotion of multi-stakeholder activities
• Promotion of inclusion and remove all language barriers
• Use of an innovative sustainable gamification model
• Focus on sustainability, aesthetic and social aspects
• Affordable and accessible for all

What would you need from the city?
We are looking for cities interested in co-creating successful and sustainable projects together with their citizens.

INCLUSIVE CO-CREATION
SOFT AND HARD RESULTS
Team for better cities.

Amsterdam Rotterdam **Athens** Milan
Solution description

What?

- Work to make public space attractive.
- Social innovation in urban issues.
- Organise sustainable transformation and design of new areas.

Where?

Greece
  - Athens

Netherlands
  - Amsterdam
  - Rotterdam

End users
- users of public space, citizens, elderly, children

Innovator
- STIPO GREECE
- Dimitra Zouni
- zounidimitra@gmail.com

Contact person

E-mail address
Solution description

Background information

• multidisciplinary urban development team,
• oriented to public space and neighborhood revitalization,
• envisioning tomorrow's cities

Expected impact of your solution

• Public space with a human touch
• Social, inclusive neighborhood
• Mentality shift through trainings and education
• Area development with long-term value
• Sustainability and circularity
• Co-creation beyond 'top down and bottom-up' to a joint playing field in urban development
• Systemic thinking/change

What would you need from the city?

Provide an area of development, access to data, share contacts, facilitate stakeholders engagement

Co-creation of public space through citizen engagement

EIT Community New European BAUHAUS call

E-SENIORS Paris
Solution description

What?
We want to explore /push/ improve new trends of hybridization applied to social activities

- Sustenance is not just eating: cooking and then tasting together with people who share the same values; ideas come from FoodLab, Silver Fourchette, Petites Cantines, Discosoupe, AMAPs, Shared gardening
- Repaircafé: Intergenerational come together with people who know how to repair and others who want either to learn or not to throw away
- E-inclusion into the web culture: teaching about e-admin, how to communicate and sell on the Internet, how to contribute to Wikipedia
- Creating apps which help staying healthy, make live easier, ...

Where?
- All along the project implementation: we first study the needs of the citizens and co-create, then we test the created product/solution with users + have a kind of external users advisory board
- During and after the project take care of choosing the right communication channel for dissemination

Who are the end users?
Our association represents the end-user, the citizen, the customer, the decision maker, ... a kind of influencer!
We want to create ideas or products in a bottom-up approach involving the representatives of the target population in all project development phases

New European Bauhaus
#NewEuropeanBauhaus
Solution description

Background information
During the ideation phase: we find the real needs the synergy / stimulation of a well-managed focus group puts the citizens in a position to express valuable ideas out of their life experience: the more original the support/animation (games, role play, theatre,..), the more interesting will be the emerging ideas.

Expected impact of your solution
Educating people about complex and ill-structured so-called socio-scientific issues such as combating global climate change, preventing the spread of coronavirus, animal testing for medical purposes, consumption of GMO foods, establishment of nuclear power plants, cloning
- Working part time after 60 and choosing another job or earning from hobbies
- Open intergenerational coworking space/incubators
- Open fitness clubs for seniors

What would you need from the city?
 provision of public spaces, places for activities, opportunities to communicate with citizens / inhabitants of the city or district, participation in food costs

Programme: Forum for Public Space Culture
Solution description

Application of 3 innovative educational methods of public discussions on public space quality for designing better places according to New Bauhaus values. The 3 methods are:
- Plebiscite for Treasures of Public Space Culture;
- Game of Landscape;
- Game of Values.

The above methods can support any participatory designing process as well as can be implemented independently as educational, socially integrating or research methods.

End users:
- organisers (city entities, NGOs, designing companies, researchers, etc.)
- participants (any target group: children, pedestrians, a particular urban area citizens, etc.).
The above methods can expose and promote any of the New Bauhaus values because they spread user-friendly spatial environments and good user experience of public space users.

I am looking for partners who would find the above methods useful for achieving their objectives.
Plebiscite for Treasures of Public Space Culture:
Site: https://skarby.ulublin.eu/
Facebook: https://www.facebook.com/skarbykulturyprzestrzeni

Game of Landscape

Solution description

What?
A possibility to build a greener future in the ever-changing urban environment. On the outside - a community garden, and a place to be one with nature - on the inside.

Where?
Andrejsotas street 27,
Riga, Latvia

Who are the end users?
The end users are everyone, who is interested in building something great together.
From seniors to youth.

#NewEuropeanBauhaus
Solution description

**Background information**

The solution is building an urban garden, where everyone can be free to organize events, relax or do activities.

**Expected impact of your solution**

Social inclusion for all, especially those less fortunate and bringing them together with other members of the community.

The Augnica aims to bring about social change through cooperation and co-creation.

**What would you need from the city?**

The main thing this project needs from the city is human resources and help. The other thing is funding or experience in building public spaces.
Please contact me!

Inhabited Spaces Full of Dreams

What?
Bringing together the memories and stories of a place in the city to boost imagination and dreams about its future, involving communities in the political decision-making process.

Where?
2 Cities
Évora, Alentejo, Portugal
Iberian City

Who are the end users?
Young People/ Local Communities
Intergenerational project

Innovator
Leonel Alegre/ Daniela Salazar

E-mail address
arterialab@uevora.pt
Inhabited Spaces Full of Dreams

**Background information**
Rossio de São Brás is an important square in the outside of historical walls of the city which is in the centre of several demands of the local communities for new uses, experiences and to return it to its citizens.

**Expected impact**
Promote Intergenerational participation;
Regaining a sense of community and belonging;
Development of creative and aesthetic methodologies of documentation, archive and storytelling;
Sharing of dreams and projects for these inhabited spaces of each city with stakeholders and decision makers;
Awareness of a holistic perspective about urban planning, including needs for people, fauna and flora.

**What would we need?**
Organisation partner focused on placemaking, community engagement, public space intervention and/or participatory creative projects.

#NewEuropeanBauhaus
Scope: Childhood

Target:
Improve cohesion in public realm through new elements designed using co-creation within vulnerable environments.

Include in the fabrication process a sustainable approach to the prototypes and the final elements.

Prototypes are going to be open source for future replicability and are going to be published in WWW.FURNISH.TECH
Scope: Elderly

Target:
Improve cohesion in public realm through new elements designed using co-creation within vulnerable environments.

Outcomes:
To encourage their daily active mobility, improving their physiological and physical wellbeing.
To encourage their sense of belonging with the larger community, hence countering their social isolation.

Keywords: Active mobility, vulnerable people, nature, inclusion, belonging, need, multilevel, participatory, transdisciplinary
Sustain.ALL

- A collaboration Lab on Sustainable Development Goals
Solution description

OUR SOLUTION

Is building a collaborative education platform/lab on SDGs to accelerate towards climate neutrality in Europe and beyond by integrating the teaching of global sustainability principles with hands-on local projects between students and (non-)institutional partners (academics, governments, citizens, companies, investors, ...).

Where: Berlin

First Implementation: TU Berlin, HU, FU, Charite (Berlin Universities)
SDG Education Lab, Project Lab, Integration & Awareness Lab

2. Implementation (2023): Enhance Alliance (European Universities)

Who are the end users?
Students from universities
Project makers as citizens, institutions, academia,
Investor: investing on SDGs

Contact person:
Innovator: Bengisu Berispek
@E-mail address: Bengisuberispek@gmail.com
How it works
Solution description

Background information

- 17 SDG Locations in Berlin
- To EDUCATE, IMPLEMENT & INTEGRATE

**Education Lab:**
To foster education on SDGs with guest lecturers on 17 SDGs and journal clubs

**Implementation Lab:** foster the implementation of local SDG-related collaborative projects with workshops and sustainable project partners

**Integration Lab:**
Raising the SDG Awareness for dissemination and knowledge sharing with community events
Expected impact of your solution

- **Sustainability**: Education, Implementation & Integration lab gives the opportunity to foster the achievement of SDGs. Building partnerships in local &

- **Experience**: Reconnecting citizens with the SDG projects in the natural landmarks, feeling sense of a sustainable community, acting For a good cause all together

- **Inclusion**: everyone has right to join, open access, giving everyone chance to educate & implement SDGs

What would you need from the city?

- Partners from each district
- Locations for the SDG awareness
- Access to data
- Stakeholder engagement
- Help on visibility of the project
- Funds
